Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Mr. John Mattingly during a telephone interview on February 21, 2008.

The application has been amended as follows:

In the Specification:

Page 11, delete "8-1 to 8-64" (line 24); after "sensors" (line 25), insert – 8-1 to 8-64 --.

Replace Claim 1 with the following:

-- 1. (Currently Amended) A biomagnetic measurement apparatus comprising means for detecting a magnetic field produced from a heart, means for calculating current vectors from said detected magnetic field, ~~means~~ and for calculating a potential waveform corresponding to a ventricular muscle cell action potential based on the change of absolute values of said current vectors with time, and means for displaying said potential waveform;

wherein ~~in said means for calculating a potential waveform~~; said potential waveform is calculated by adding the absolute values of said current vectors in a period

Art Unit: 2863

from a start time of depolarization of the heart to an end time of depolarization of the heart, and said potential waveform is calculated by subtracting the absolute values of said current vectors from the value of said potential waveform at the end of depolarization of the heart in a period from the end of depolarization of the heart to an end time of repolarization of the heart. --

In Claim 9:

line 1, after "apparatus", insert -- comprising calculating means --.

line 13, after "and", insert -- means for displaying --; after "waveform", delete -- is displayed --.

In Claim 11:

line 1, after "apparatus", insert -- comprising calculating means --.

line 10, after "(x, y)", replace "to display" with -- and means for displaying --.

In Claim 12:

line 4, after "time,", insert -- and --.

line 5, before "wherein", insert -- calculating means, --.

Reasons For Allowance

The **combination** as claimed wherein said potential waveform is calculated by adding the absolute values of said current vectors in a period from start time of depolarization of the heart to end time of depolarization of the heart, and it is calculated by subtracting the absolute values of said current vectors from the value of said potential waveform at the end of depolarization of the heart in a period from the end of depolarization of the heart to end time of repolarization of the heart (claims 1, 11, 12) or calculating a potential waveform in a period corresponding to depolarization of the heart using the claimed formula and calculating a potential waveform in a period corresponding to repolarization of the heart using another claimed formula (claims 5, 9) is not disclosed, suggested, or made obvious by the prior art of record.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsukada et al. (US 6,230,037) discloses a biomagnetic field measuring apparatus (Fig. 7). Tsukada et al. discloses temporal waveforms of tangential component (B_x) (Fig. 13) and time interval T1 indicating depolarization of the heart and T2 indicating repolarization of the heart (Fig. 13).
